LECTURE 5: SOFTWARE PROJECT MANAGEMENT

Lecture 5 Software Engineering 1 Introduction The “software crisis” of the 1960s and 1970s was so called because of a string of high profile software project failures: over budget, overdue, etc The crisis arose in part because the greater power available in computers meant that larger software projects were tackled with techniques developed on much smaller projects ...

SOFTWARE DESIGN TECHNIQUES - Computer Science

software engineering is the abject lack of a science for software design In October 2003, he attended a National Science Foundation (NSF) workshop in Virginia on the “Science of design” Fred Brookes, “We don’t know what we’re doing, and we don’t know what we’ve done”

A Comparison Between Five Models Of Software Engineering

Component-based software engineering : The system is assembled from existing components There are many variants of these models eg formal development where a waterfall-like process is used, but the specification is formal that is refined through several stages to an implementable design[1] 3 Five Models A Programming process model is an abstract representation to ...
