Walking a Software Handover Process

Software handover deals with a transfer of a software system from one party to another Its design is strongly dependent on who transfers to whom, the criticality of the system to be transferred, its lifecycle phase, system knowledge, technology used and many other factors [3][9] As illustrated in [3][9], it may be conducted in many strongly varying contexts One of them is a handover of a

A Framework for Software System Handover

In this thesis, we suggest a framework for software system handover that provides a basis for creating handover process models The framework is called EM3: Handover Framework and it is part of Evolution and Maintenance Management Model (EM3) The framework comprises six major parts: taxonomy of handover activities, handover contexts, handover types, handover roles, handover ...

From Projects into Operations: Lessons for Data Handover

project completion; and different data formats and structures are used in project delivery and operations Lessons learnt from leading practice include defining data requirements at the outset, getting operations teams involved early, shaping the evolution of interoperable systems and standards, developing handover processes to check data rather than documentation, and fostering skills to use

How can we hand over projects better?

project handover Defining handover is necessary to ensure all parties have an agreed focal point and their efforts are aligned to a common goal Dates, priorities and responsibility allocation must be clearly communicated Assumption of these can put handover at risk Understanding that handover is a transition period rather than a date is paramount to smooth the change curve and close the
