UNIT 62: STRENGTHS OF MATERIALS Unit code: K/601/1409 QCF ...

Materials in a stressed component often have direct and shear stresses acting in two or more directions at the same time This is a complex stress situation The engineer must then find the maximum stress in the material We will only consider stresses in two dimensions, x and y The analysis leads on to a useful tool for solving complex stress problems called Mohr's' Circle of Stress 11

Strengthening Mechanisms

Four main ways of controlling the strength: (a) Solid Solution In non-crystalline materials we do different things •SPECIFIC Dislocations distort the crystal lattice Various obstacles also distort the crystal lattice Stress/strain fields from both will interact with each other, which reduces v (the dislocation velocity) This in effect increases the stress required to cause the

EFFECT OF SODIUM HYDROXIDE CONCENTRATION ON FRESH ...

Compressive strength, Sodium hydroxide concentration 1 Introduction With the increased use of cement in concrete, there have been environmental concerns both in terms of damage caused by the extraction of raw materials and emission of carbon dioxide during cement manufacture This has brought pressures to reduce the cement consumption in the construction industry An attempt in this regard is
