Lecture 8 - Timing Constraints

We ask the questions: 1When DB is sampled on the rising edge of CB, is DB stable or not? The answer to this question produces the setup time requirement constraint Here we consider what causes DB to change (the falling edge of CA), and how long it takes for this change to propagate to DB (t_{P+D}) Then we add the setup time to this (because CB MUST BE STABLE t_S before the clock edge) This
